The Universal camera base has a 1" diameter rubber ball connected at right angles to a 2.5" diameter base with a centered 1/4"-20 thread. The base adds support to the thread, by allowing the camera to rest on the plate, creating a stable connection with the camera.

Note:
The male 1/4" long, 1/4"-20 thread in the middle of the 2.5" diameter base will connect to the standard female thread found at the bottom of most still and video cameras.

NOTE: Unless stated, the RAM-B-238U (diamond) is the only adaptor that will attach to RAM cradles. The RAM-202U (round base) is the only adaptor that will attach to the Aqua Boxes and RAP-300-1 (radar detector) mount.
